

WELLNER BOX

Mobile video surveillance for outdoor use.

Thanks to its modular design and flexibility, the WellnerBOX covers a wide range of application scenarios. Mobile video surveillance is one of our core competencies, one that is being requested more and more frequently.

In order to better meet the special requirements of mobile video surveillance at major events, we have developed a new model of our security solution specifically for this need: as light, mobile + flexible as possible, without neglecting the most important principle of video surveillance:

to deliver perfect and high-resolution photos, day and night - reliably and with live evaluation.

Technical features of the WellnerBOX "mobile"

- 360° detection range with to zoom, rotation, and swivelling high-speed dome camera
- Analysable recordings thanks to a built-in video recorder
- Features of the standard camera unit with 4 motion detectors | 2 speakers | 4 infrared headlights | modular extensions possible
- Self-sufficient & modular power supply with high-performance batteries and fuel cells
- Fault-proof data transmission in real-time by to the integrated GSM / UMTS / LTE modem
- IP66 protection degree, vandalism-proof housing, weight under 750 kg
- Robust telescopic mast with a maximum height of 9 metres

TOP features of the WellnerBOX "mobile"

- Preconfigured sensor head
 - + no need for a technician on-site
- Can be assembled on vehicle trailers
 - + transportable with any vehicle and Class B driver's licence
- Sophisticated construction
 - + set-up and dismantling by only 1 instructed person possible
- Easy handling
 - + operational in under 30 minutes
- Light & portable design
 - + trouble-free repositioning / moving even without the use of technology
- Connection to video control possible
 - + conduct virtual guard patrols
 - + respond in real-time
 - + point-specific use of reaction forces
- Connection of several WellnerBOXes
 - + monitoring of any large areas
- Flexible height
 - + perfect overview for every application area

Areas of application of the WellnerBOX "mobile"

- Real-time monitoring of public places
- Documentation of police actions
- Video surveillance of demonstrations and rallies
- Proactive monitoring of seasonal events, such as New Year's Eve | carnival
- Regulation of visitor flows at regional festivals, such as fairs | weekly and Christmas markets | beer festivals
- Live monitoring of cultural events, such as jubilees | concerts | festivals
- Securing sporting competitions, even in remote and outdoor areas

Overview of the application areas of the WellnerBOX "classic"

Construction Site Monitoring

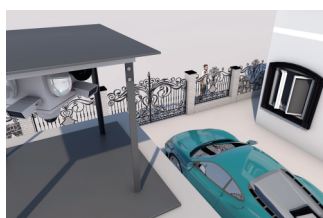

The WellnerBOX works independently of supply networks, on any terrain, and also under adverse circumstances of an outdoor construction site. Dust and splash-proofed, the sensor unit reliably secures parked construction vehicles, stored materials, and machines.

Perimeter Security

Can you successfully prevent unauthorised entry, vandalism, and theft? And how!

The WellnerBOX is compact, transportable, robust, and weatherproof, and can be active and alert throughout the day and night, thanks to its self-sufficient energy supply.

Property Security

For this, we use only the compact camera head. Existing power connections allow installation on masts, on top of or on buildings: fast & uncomplicated. Connected to a video control stand, it can be activated quickly in the event of an alarm + false alarms can be prevented.

Theft Protection

Preventive theft protection is the solution against thieves. Prevent damage before it can arise. Benefit from our proven security technology and actively prevent theft. We are happy to advise you.

Security Services / Guard Patrol

The WellnerBOX offers the possibility of virtual guard patrols, is never tired, is effective, observant and secures at night in a 360° circumference, can be integrated into central monitoring systems, maintains continuous contact with a control centre, and thus supports the services of any security service.

Features of the WellnerBOX in Comparison
